

**YOU'VE LIVED
THROUGH
THE PAST...**

...come tell us about the future.

The European Union has been instrumental in bringing economic stability and improved social conditions to Northern Ireland and the border counties of Ireland - particularly through the PEACE and INTERREG programmes. With the new programmes starting in 2007, a series of discussions are taking place to hear your views on the past and the future of the programmes.

Following these initial discussions, we will be holding a three month consultation in the autumn on the proposed programmes.
